Contents:

---

## Gingerit

---

Correcting spelling and grammar mistakes based on the context of complete sentences. Wrapper around the ginger-software.com API

- Free software: ISC license
- Documentation: <https://gingerit.readthedocs.org>.

### 1.1 Installation:

```
pip install gingerit
```

### 1.2 Usage:

```
from gingerit.gingerit import GingerIt

text = 'The smelt of fliwers bring back memories.'

parser = GingerIt()
parser.parse(text)
```

### 1.3 TODO:

- More tests
- Commandline Tool

### 1.4 Contributing:

1. Fork it
2. Create your feature branch (*git checkout -b my-new-feature*)
3. Commit your changes (*git commit -am 'Add some feature'*)
4. Push to the branch (*git push origin my-new-feature*)

5. Create new Pull Request

## 1.5 Thanks

Thank you for [Ginger Proofreader](<http://www.gingersoftware.com/>) for such awesome service. Hope they will keep it free :)

Thanks to @subosito for this inspiration <https://github.com/subosito/gingerice> (Ruby Gem)

---

# Installation

---

At the command line:

```
$ easy_install gingerit
```

Or, if you have virtualenvwrapper installed:

```
$ mkvirtualenv gingerit  
$ pip install gingerit
```

---

### Usage

---

To use Gingerit in a project:

```
import gingerit
```

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

### 4.1 Types of Contributions

#### 4.1.1 Report Bugs

Report bugs at <https://github.com/azd325/gingerit/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

#### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

#### 4.1.4 Write Documentation

Gingerit could always use more documentation, whether as part of the official Gingerit docs, in docstrings, or even on the web in blog posts, articles, and such.

#### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/azd325/gingerit/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 4.2 Get Started!

Ready to contribute? Here's how to set up *gingerit* for local development.

1. Fork the *gingerit* repo on GitHub.
2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/gingerit.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv gingerit
$ cd gingerit/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 gingerit tests
$ python setup.py test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.6, 2.7, 3.3, and 3.4, and for PyPy. Check [https://travis-ci.org/azd325/gingerit/pull\\_requests](https://travis-ci.org/azd325/gingerit/pull_requests) and make sure that the tests pass for all supported Python versions.

## 4.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_gingerit
```

---

**Credits**

---

## 5.1 Development Lead

- Tim Kleinschmidt <[tim.kleinschmidt@gmail.com](mailto:tim.kleinschmidt@gmail.com)>

## 5.2 Contributors

None yet. Why not be the first?

---

## History

---

---

**0.5.5 (2015-01-11)**

---

- Updates requirements and python package

---

## Indices and tables

---

- `genindex`
- `modindex`
- `search`
